

Startup Fullscreen

The screenshot shows a GitHub repository page for 'egonl / PortionOfScreen'. The repository is public and has 11 stars, 2 watchers, and 1 fork. It is currently on the 'main' branch with 1 branch and 2 tags. The repository contains several files: 'github/workflows', 'PortionOfScreen', '.gitignore', 'LICENSE', 'PortionOfScreen.sln', and 'README.md'. The 'README.md' file is selected, showing its content. The README describes 'Portion of Screen' as a lightweight Windows application for sharing parts of the screen in video conferencing apps like Microsoft Teams. It includes usage instructions and notes. The repository also shows 7 commits, 1 release ('Portion of Screen v1.0'), and 1 language (C++ 98.3%).

Portion of Screen

Share a portion of your screen in Microsoft Teams

Portion of Screen is a lightweight Windows application that enables you to share a part of your screen in video conferencing apps that only support full screen or just a single window.

Usage

- Start `PortionOfScreen.exe` and position its window over the part of the screen that you want to share.
- In a Teams meeting, select `Share > Window > Portion of Screen`.
- You can resize and move the `Portion of Screen` window while presenting.

Notes

- You (the presenter) won't see the `Portion of Screen` window if it doesn't have the focus. However, your attendees will see the `Portion of Screen` window.
- If you close the `Portion of Screen` window, Teams will automatically stop sharing.
